

Pumps and water management systems for the commercial, industrial, and fire protection markets.

Advanced variable frequency drive technology for HVAC applications.

Full line of induction synchronous and DC motors in sizes from 1/4 HP to 10,000 HP.

Vibration and sound control in all types of commercial and industrial applications.

Domestic water booster systems and packaged pump systems.

Complete line of sectional cast iron boilers.

Vertical turbine pumps

Circulator pumps

Honeywell Analytics
experts in gas detection

Gas monitoring systems

State of the art boilers, pool and hot water heaters.

Other Manufacturers Represented

- Armstrong International..... Steam specialties, reducing valves radiator, traps etc.
- Layne Vertiline Pumps..... Turbine, mixed flow & fire pumps
- Laars Copper fin tube boilers – Hydronic, water & pool heaters
- Flanders Precisionaire..... Air filters and filter housings
- Guardian Fire Equipment..... Fire protection equipment.
- Islip Flow Controls Flow control products
- Metron/Firetrol/Joslyn Clark..... Fire pump controllers
- Polaris Thermal Corp. Plate heat exchangers
- Twin City Hose Braided hoses & flex couplings
- Wessels Company Tanks, air separators, Hydronic devices, etc.
- Winters Gauges, thermometers, sensors & other measuring devices
- Wheatley HVAC & Hydronic products
- Zentox Water treatment & air purification products

Factory Authorized Service

In addition to the great products we sell, R M Myers Company's certified team of technicians can service and start-up variable frequency drives (VFDs) and trouble-shoot and repair other manufacturer's VFDs. Additionally, our team can perform specified maintenance on domestic water booster systems, as well as design and build custom electrical panels.

R.M. Myers Company, Inc. serving Florida and Georgia since 1961
